CHENNAI, TAMIL NADU - 600024, INDIA

OBJECTIVE

Results-oriented and detail-driven **B.Tech graduate in Artificial Intelligence and Data Science, seeking a Java Full Stack Developer role. Skilled in Java, SQL, HTML, CSS, and JavaScript** with a strong foundation in database management and software development. Eager to contribute to building scalable, user-focused applications while enhancing expertise in modern frameworks and full stack technologies within a collaborative and growth-driven environment.

EDUCATION

- **Bannari Amman Institute of Technology** APRIL 2025
B.Tech graduate in Artificial Intelligence and Data Science
◦ GPA: 7.04 ERODE, INDIA
- **St. Theresa's girls higher secondary school** MARCH 2021
H.S.C
◦ Aggregate: 88% KARUR, INDIA
- **Sree Saradha Girls Higher secondary school** MARCH 2019
S.S.L.C
◦ Aggregate: 85% KARUR, INDIA

SKILLS

- **Programming Languages:** JAVA, SQL
- **Web Technologies:** HTML, CSS
- **Tools & IDEs:** Vs Code, EditPlus, SQL*Plus
- **Databases:** MySQL, Oracle

PROJECTS

Refined LSTM and Optimization Method for Precise Energy Consumption Detection in Large Buildings

Developed a hybrid **LSTM–Beluga Whale Optimization (BWO)** model to predict hourly electricity usage across large buildings. Trained on 50,000+ energy readings, achieving an RMSE of 1.34%, outperforming LSTM and RNN baselines. Enabled anomaly detection, optimized resource allocation, and sustainable energy management.

Technologies: LSTM, BWO, Deep Learning, Optimization Algorithms

Advanced Ambulance Rescue System Using Prioritized Traffic Switching

Designed a real-time ambulance detection and intelligent traffic control system using OpenCV and Python threading. Improved emergency response efficiency by dynamically prioritizing traffic signals and reducing ambulance transit times.

Technologies: OpenCV, Python, Real-Time Systems, Traffic Management Systems

LANGUAGES

- English – Intermediate Proficiency

PAPER PRESENTATIONS

- **Heart Disease Prediction using Machine Learning Algorithms** – VIT Institutions, Chennai. Presented Random Forest, Logistic Regression, and KNN achieving 85% accuracy in predicting heart disease.
- **Advanced Ambulance Rescue System** – ICAIHMS'25, Karpagam Institute of Technology. Showcased innovative real-time ambulance detection and intelligent traffic management.

HOBBIES

- Passionately explores diverse music genres to broaden cultural understanding.
- Actively engages in self-improvement by acquiring new technical skills, fostering innovation and adaptability.
